SKILLS

Frontend

HTML, CSS, Bootstrap, JavaScript, TailwindCSS, Reactjs

Backend

Java, Nodejs, Expressjs, EJS, SQL, MongoDB, Mongoose

PROJECTS

Keeper App
Frontend Project

Developed a lightweight and user-friendly note-taking web application, Keeper. Inspired by Google Keep, it allows users to efficiently organize thoughts, create to-do lists, and manage notes in a visually appealing and intuitive interface.

Reactjs

Personal Blog Website
Fullstack Project

The website allows users to create and store daily blogs. Each blog is accessible individually by using its title in the URL, providing an organized and user-friendly way to read and share content.

HTML, CSS, Bootstrap, JavaScript, Nodejs, Expressjs, MongoDB, Mongoose

Newsletter Signup Page
Backend Project

The "Newsletter Signup Page" project is a web application that allows users to sign up to receive daily news updates. The backend of the application is utilizing the Mailchimp API to handle the storage of user data and manage subscriptions.

HTML, CSS, Bootstrap, JavaScript, Nodejs, Expressjs, Mailchimp API

Drumkit Website
Frontend Project

The "Drumkit Project" is a web application that replicates a drum kit. It includes various drum kit instruments, and when the user clicks on their respective icons or keys, the application produces sounds identical to the selected instrument.
